

LAB³'S BEDROCK

FOR MICROSOFT AZURE

Used by 60+ global organisations.

Switch on Day 2 cloud efficiency with an accelerated Azure landing zone deployment.

5x Microsoft Solution Partner
6x Microsoft Advanced Specialisations
200+ certified Azure specialists
Microsoft Intelligent Security Association member

Deploy secure, full-featured landing zones as code, and be fully operational in weeks, not months.

Your Bedrock landing zones have everything you need to ensure ongoing efficiency and ROI in the cloud, including bespoke DevOps tools built to meet your specific business requirements.

Scale up at pace using packaged, best-practice architecture based on decades of industry expertise.

Cloud value unlocked

- Operational efficiency
- Heightened security
- Cost savings
- Streamlined deployments

TURN CLOUD COMPLEXITY INTO CLOUD OUTCOMES, WITH A PACKAGED AZURE LANDING ZONE.

NETWORK PARTNER

FROM CLICK-OPS TO DEVOPS

DO MORE, FASTER, WITH LESS.

Bedrock landing zones provide automated, secure and scalable environments for organizations to rapidly innovate, modernise and migrate workloads in Microsoft Azure.

Bedrock's rich integration with Azure DevOps gives application teams everything they need to bootstrap their infrastructure deployment, including preconfigured projects, pipelines, repositories, templates and identities.

Bedrock also includes "Day 2" operational solutions for Monitoring, Update Management, Backup and Recovery, and Governance in the cloud.

Cloud capabilities activated

- Automated cost control
- Built-in governance
- Secure coding
- Automated provisioning
- Operational alerting

THE RESULT

World class cloud efficiency, delivered as code.

Deployed using Terraform Infrastructure as Code automation modules

Aligned to Microsoft's Cloud Adoption Framework best practise architecture

Establishes DevOps capabilities with blueprinted deployment pipelines

Deploy secure, cost-optimized landing zones that scale with your business

- Uplift your current environment, or create a fresh "greenfields" Azure landing zone
- Roll out additional Azure services with ease using custom blueprints
