SECURE & GOVERN DATA ACROSS M365, AZURE, AND AI

Reduce regulatory risk and enable safe, compliant AI adoption

DATA SECURITY

ENVISIONING WORKSHOP

A fully-funded, facilitated strategy engagement delivered by LAB³ Security Experts. Assess your existing environment and data to understand your data protection and compliance posture across Microsoft 365, Azure, and on-premises environments

You'll uncover where your most sensitive data lives, how it's used and shared, and how to prevent critical data loss as you scale Copilot and AI.

GET INVOLVED

2 – 3 weeks

estimated engagement

4 – 6 hours total

required effort from your team

Audience

Ideal for CIOs, CISOs, Data Governance and Risk Managers, Leaders exploring Copilot or AI at scale

Includes Microsoft-funded
Zero Trust Assessment

Prevent Data Leaks. Strengthen Compliance. Enable AI Safely.

CLARITY

Discover where your sensitive data resides and who can access it.

CONTROL

Detect insider risks and compliance gaps early.

CONFIDENCE

Executive-ready roadmap to achieve AI-ready data security posture.
