

IS YOUR SENTINEL COSTING 30% MORE THAN IT SHOULD?

Most organisations we audit have significant savings hiding in plain sight. If you're experiencing sprawl with security spend then you are not alone.

80% of organisations overspend on **Microsoft Sentinel** by 20-40%

Orphaned resources often account for thousands in wasted spend

Misconfigured tiers and unused features contribute to bill shock.

INTRODUCING OUR SECURITY PULSE CHECK

Using automation, LAB³ uses our Pulse Check tool to rapidly assess your environment.

In 2-minutes with Zero disruption:

- ✓ Pinpoint unnecessary spend
- ✓ Identify gaps in security posture
- ✓ Map a path to efficient, compliant, and cost-optimised security.

Rein in security spend and line up a pulse check. Connect with our team today.

LAB3.COM.AU

SIEM spend is funding volume, not security outcomes.

Stop paying to store noise!

“

Sentinel cost issues are usually symptoms of missing operating controls: what we collect, why we collect it, how long we keep it, and how it produces detections.

Pulse Check establishes the baseline and the guardrails to scale with confidence.
